flange [flanj] (plural flang-es)

noun

collar for attaching or strengthening: a projecting collar, rim, or rib on an object for fixing it to another object, holding it in place, or strengthening it. Flanges are often found on pipes and shafts.

[Late 17th century. Origin uncertain: perhaps a variant of *flanch* "device at the side of an escutcheon." The current meaning evolved via "protruding rim" from "part that widens out."]
